

FOOTPRINT REDUCTION

WE ALL CAN MAKE A POSITIVE DIFFERENCE

ANADARKO IS PROVIDING MORE ENERGY FROM LESS SPACE

- Advances in drilling and completion techniques have sometimes allowed 16 directional wells to be drilled from a two-tiered pad

 **2009 EARTH DAY AWARD**
The Utah Board of Oil, Gas and Mining recognized the Greater Natural Buttes team for their voluntary and proactive measures to protect the environment

RECYCLING CALICHE TO IMPROVE RECLAMATION EFFORTS

- Some crews have used 3,000 tons of caliche to construct a drilling pad, but recycled half of the material to build subsequent pads
- Air pollution was decreased due to fewer truck hauls
- Landowner relations improved by reducing the operational footprint and returning property to its natural state

HOW YOU CAN MAKE A POSITIVE DIFFERENCE

- **Recycle** paper, glass, aluminum cans and plastic, and properly dispose of electronics
- **Plant your own garden** or purchase locally grown fruits and vegetables
- **Go green by composting** food and yard waste to reduce the amount of garbage sent to landfills
