

ENTERPRISE, ENBRIDGE AND ANADARKO TO JOINTLY DEVELOP NEW NGL PIPELINE LINKING KEY NATURAL GAS PRODUCING BASINS TO THE GULF COAST

Houston and The Woodlands, Texas (September 6, 2011) – Enterprise Products Partners L.P. (NYSE: EPD), Enbridge Energy Partners, L.P., (NYSE: EEP) and Anadarko Petroleum Corporation (NYSE: APC) today announced an agreement to design and construct a new natural gas liquids (NGL) pipeline that will originate from Skellytown, Texas in Carson County and extend approximately 580 miles to NGL fractionation and storage facilities in Mont Belvieu, Texas. The new Texas Express Pipeline (“TEP”) will help producers in West and Central Texas, the Rocky Mountains, Southern Oklahoma and the Mid-continent maximize the value of their natural gas production by providing additional takeaway capacity and enhanced access to the Gulf Coast NGL market. Initial capacity on TEP will be approximately 280,000 barrels per day (BPD), which can be readily expanded to approximately 400,000 BPD.

In addition, the joint venture will include two new NGL gathering systems. The first will connect TEP to natural gas processing plants in the Anadarko/Granite Wash production area located in the Texas Panhandle and Western Oklahoma. The second NGL gathering system will connect the new pipeline to Central Texas, Barnett Shale processing plants. Volumes from the Rockies, Permian Basin and Mid-continent regions will be delivered to the TEP system utilizing Enterprise’s existing Mid-America Pipeline (“MAPL”) assets between the Conway hub and Enterprise’s Hobbs NGL fractionation facility in Gaines County, Texas. Enterprise will construct and serve as the operator of the pipeline, while Enbridge will build and operate the new gathering systems. The pipeline and gathering systems are expected to begin service in the second quarter of 2013, subject to regulatory approvals.

“We are very pleased to partner with Enbridge and Anadarko on this project, which offers a comprehensive industry solution for addressing NGL transportation constraints that are currently limiting

access to the largest domestic NGL market located along the Gulf Coast,” said Michael A. Creel, Enterprise president and chief executive officer. “The new pipeline and gathering systems, which are underpinned by long-term contracts, will also have the capability to provide takeaway capacity for other producing areas not presently served by the MAPL system, including Oklahoma’s Granite Wash, the Anadarko-Woodford basin, and the Barnett Shale. Wider access to multiple production areas, in addition to a competitive transportation fee structure, makes this an attractive option for producers and natural gas processors. NGLs controlled by affiliates of Enterprise, Enbridge and Anadarko will solidly anchor the project.”

“Enbridge is also very pleased to be working with Enterprise and Anadarko on this critical NGL pipeline,” said Mark Maki, president of Enbridge Energy Partners, L.P. “Through our extensive gathering and processing assets, Enbridge has developed a significant and growing NGL supply position in Texas and Oklahoma. The Texas Express Pipeline will provide guaranteed NGL access to the primary U.S. petrochemical market in Mont Belvieu, ensuring premium NGL netbacks for our customers. Importantly, the Texas Express pipeline fulfills a key strategic objective of Enbridge to extend our value chain from gathering and processing to include NGL transportation, providing Enbridge’s unit holders with a new source of strong and stable cash flow.”

Anadarko Vice President, Midstream, Danny Rea, said, “This project will further enhance our ability to consistently access premium Mont Belvieu markets and increase the wellhead netbacks for our growing NGL production from our Rockies and Texas assets, as well as better align our interests with the project developers through our equity participation.”

While providing producers with much-needed takeaway capacity, TEP will also supply petrochemical facilities with a reliable, domestic source of feedstock. Demand for natural gas-derived feedstocks remains strong, driven by the wide spread between crude oil and natural gas prices.

Enterprise Products Partners L.P. is the largest publicly traded partnership and a leading North American provider of midstream energy services to producers and consumers of natural gas, NGLs, crude oil, refined products and petrochemicals. Enterprise’s assets include approximately: 50,200 miles of onshore and offshore pipelines; 192 million barrels of storage capacity for NGLs, refined products and crude oil; and 27 billion cubic feet of natural gas storage capacity. Services include: natural gas transportation, gathering, processing and storage; NGL fractionation, transportation, storage, and import and export terminaling; crude oil and refined products storage, transportation and terminaling; offshore

production platform; petrochemical transportation and storage; and a marine transportation business that operates primarily on the United States inland and Intracoastal Waterway systems and in the Gulf of Mexico. For more information visit www.enterpriseproducts.com.

Enbridge Energy Partners, L.P. owns and operates a diversified portfolio of crude oil and natural gas transportation systems in the United States. Its principal crude oil system is the largest transporter of growing oil production from western Canada. The system's deliveries to refining centers and connected carriers in the United States account for approximately 13 percent of total U.S. oil imports; while deliveries to Ontario, Canada satisfy approximately 70 percent of refinery demand in that region. EEP's natural gas gathering, treating, processing and transmission assets, which are principally located onshore in the active U.S. Mid-Continent and Gulf Coast area, deliver approximately 2.5 billion cubic feet of natural gas daily. Enbridge Energy Management, L.L.C. (NYSE: EEQ) manages the business and affairs of EEP and its sole asset is an approximate 14 percent interest in the EEP. Enbridge Energy Company, Inc., an indirect wholly owned subsidiary of Enbridge Inc. of Calgary, Alberta, (NYSE: ENB) (TSX: ENB) is the general partner and holds an approximate 25 percent interest in EEP. Additional information is available at www.enbridgeus.com.

Anadarko Petroleum Corporation is one of the world's largest independent oil and natural gas exploration and natural gas exploration and production companies with 2.42 billion barrels-equivalent of proved reserves as of year end 2010. The company has significant producing properties in southwest and West Texas, including premier positions in the Eagleford Shale, Ozona area and Permian Basin. The company also is among the largest operators in the Rocky Mountain region, and combined with its master limited partnership, Western Gas Partners, LP (NYSE: WES), has extensive midstream infrastructure throughout its U.S. onshore operating areas. Anadarko's mission is to deliver a competitive and sustainable rate of return to shareholders by exploring for, acquiring and developing oil and natural gas resources vital to the world's health and welfare.
