

ANADARKO IS ...

- Committed to work/life balance
- Providing in-house technical and leadership development programs
- Offering a flexible work schedule and paid time-off programs
- Fostering an environment that recognizes and rewards success
- Providing an excellent benefits program
- Offering an educational reimbursement program
- Empowering employees to be accountable and responsible
- Supporting the communities in which we live and work

DISCOVER ANADARKO

- One of the world's largest independent oil and natural gas exploration and production companies with a deep and diversified inventory of projects and opportunities
- An industry-leading explorer and operator using leading-edge technology in deep-water basins
- A recognized pioneer in finding and producing unconventional resources
- Committed to preserving our environment and enhancing our communities
- Named "2009 Energy Company of the Year" at the Platts Global Energy Awards
- One of Fortune Magazine's "Most Admired Companies"
- The New Economy Magazine's Exploration & Production Company of the Year

DISCOVER THE OPPORTUNITIES

With operations in key basins throughout the world, Anadarko has the right people, the right assets, and the right strategy to continue building upon its strong track record of success. We look for opportunities where we can leverage our skill sets and build partnerships to support our company's efforts to deliver vital oil and natural gas resources to our world.

Matt Averill
Senior Geophysicist
MS & Ph.D., Geophysics
University of Texas, El Paso

Geology

A quest for the next big discovery gives Anadarko's geologists an opportunity to work some of the hottest exploration plays around the world. Anadarko is looking for big resources, high-impact discoveries, and our talented G&G team is deeply embedded in this effort. Most will start their careers in one of Anadarko's active drilling areas, while others will start in an exploration area.

Geophysics

New geophysicists become a valued part of a technical team whose job is to identify, capture, drill and develop the energy our world needs. Your skills will be enhanced as you enjoy on-the-job training, mentoring and assignments that allow your innovation and ingenuity to shine.

Accelerate Your Career

Discover how Anadarko's geologists and geophysicists use leading-edge technology and innovative ideas to unlock new resources. As a new G&G professional, you'll be engaged in meaningful projects with real responsibility. Many of our new recruits join the company after working as an intern at Anadarko. Others are recruited from college graduate programs.

Discover Your Potential

Anadarko employees are given the chance to work on challenging and rewarding projects across many horizons. We give you the responsibility from day one and provide the support you need to make meaningful contributions to our team. Our success is driven by great thinking, a willingness to share and grow knowledge and a common desire to find new ways to solve challenges. At Anadarko, you gain real experience and discover your potential.

"Anadarko is a great place to work. I am working on an amazing project and interacting with employees across all disciplines. The team work and culture is impeccable. People are very friendly and easy to work with. The ability to broaden my horizons is one thing that makes me glad to work here. I have had the ability to cross train in engineering, leadership and contract classes as well as hone my geoscience skills."

"I choose to major in geology once I took the Physical Geology course in college. It was very interesting and intriguing to learn about the processes the earth can undergo and the development of the different depositional environments. I became a geophysicist to couple my love of geology and mathematics. This allowed me the opportunity to look at the subsurface and put together the processes that have taken place in the particular area of the world I am currently working."

*Michelle Abraham
Staff Geophysicist
Ph.D. Geology
University of Oklahoma*
