DISCOVER ANADARKO

Anadarko employees have the opportunity to work on challenging and rewarding projects across many horizons. Our success is driven by innovative thinking, a willingness to share and grow knowledge, and a common desire to safely find and develop the energy resources our world needs.

Committed to protecting the environment, public health and the communities in which we live and work, while finding and producing the vital oil and natural gas resources that fuel modern life

A Fortune 500 company with a premier position in major U.S. onshore shale and resource plays, oil-focused opportunities in deepwater basins worldwide, and a transformational LNG project in Mozambique

Ranked second in Rigzone's top independent companies where oil and natural gas professionals want to work

DISCOVER Information Technology Services Internship

Your Talent in Action

Technology is one of the most important factors driving Anadarko's competitive advantage, and our Information Technology Services (ITS) team works hard to keep the company ahead of the pack.

When you join the ITS team, you'll find a blend of experienced information technology professionals working alongside newcomers to the field. This mix provides Anadarko with a wealth of experience, fresh ideas and the capability to turn those ideas into value.

Accelerate Your Career

During your Anadarko Internship, you will work on a business-relevant project in a fast-paced environment.

In addition to technical and industry training, you will gain exposure to technologies such as: Cloud Computing, Application Containerization/Orchestration, Mobile & Web Application Development, Databases (SQL, NoSQL), BI/Analytics, Network Infrastructure, Network Security, Data Storage or Servers (Windows, Linux).

Recent Intern Project Examples:

- Develop a next generation platform for deploying and managing applications using containers and container orchestration technologies (Docker, Kubernetes, Linux).
- Develop a mobile-first, responsive web application that enables users to control data integration jobs (AngularJS, Bootstrap, Typescript, Java, Spring).
- Evaluate new Microsoft technologies and determine if they can be leveraged to centrally manage unstructured content and the security of the content while increasing productivity and efficiency.
