ANADARKO IS ... PROVIDING FOR TODAY, INNOVATING FOR TOMORROW

Anadarko Petroleum Corporation’s mission is to deliver a competitive and sustainable rate of return to shareholders by exploring for, acquiring and developing oil and natural gas resources vital to the world’s health and welfare. As of year-end 2013, the company had approximately 2.79 billion barrels-equivalent of proved reserves, making it one of the world’s largest independent exploration and production companies.

About the Gulf of Mexico
Oil and natural gas from the Gulf of Mexico are an important part of the United States’ energy mix. Anadarko is among the largest independent producers in the deepwater Gulf of Mexico. With approximately 2.5 million net acres and multiple operated floating facilities, we are a recognized leader in safety, project management and value creation.

Committed to Health, Safety and the Environment
Anadarko’s primary goal is for each employee to return home safely at the end of every day. Employees and contractors promote this culture of safety by following the LiveSAFE program—a relationship-based organizational commitment to workplace safety that emphasizes responsibility for personal safety and the safety of coworkers. In 2013, the company achieved a record-low total employee recordable incident rate of 0.28, among the lowest in the industry.

Anadarko is dedicated to leveraging technology to produce energy resources in a manner that protects marine life and ecosystems in the Gulf of Mexico.

Applying Technology & Expertise to Safely Maximize Value

Anadarko and its team of experienced explorers are committed to excellence in developing deepwater discoveries. The production of oil and natural gas from far beneath the sea floor to a platform requires engineering and technology that rivals national space programs. Anadarko and its partners apply creative and innovative solutions to safely engineer, design, fabricate and install major deepwater projects on time and on budget. The company’s “hub-and-spoke” philosophy enables Anadarko to tie back new developments to existing facilities more quickly and cost effectively than many of its peers. Anadarko’s “design one: build two” approach to these developments enhances value and accelerates completion time by replicating existing truss-spar designs.

Design One: Build Two

Lucius: 80,000 BOPD Spar
First Oil Expected 2014

Heidelberg: 80,000 BOPD Spar
First Oil Expected 2016

Shenandoah Basin – An Emerging Giant Oil Opportunity

In 2013, Anadarko announced the results of its Shenandoah-2 appraisal well – successfully delineating what may be Anadarko’s largest-ever oil discovery in the deepwater Gulf of Mexico. Anadarko is the only producer with an ownership position in all three Shenandoah basin discoveries and plans to have an active appraisal program in the basin during 2014.

Anadarko Key Statistics

- 27 Total Years of Ultra Deepwater Rig Time Under Contract
- ~70% Five-Year Deepwater Exploration/Appraisal Success Rate
- ~63% Average Working Interest in 444 Blocks
- Industry-Leading Project-Management Skills
- Visible Development Project Pipeline
- Most Active Driller in Water Depths of More Than 2,500 Feet
